DATE: September 1, 2017  
TO: Industry Test Sponsors  
FROM: Andrew Buczynsky  
SUBJECT: Elastomer Test Registration and Uploads to dexosTRC.org

The dexos® Test Registration Center (dTRC) serves as GM's storage location for all dexos test data. To achieve that goal, ***dTRC test registration and upload will be available September 6, 2017 for the following elastomer tests: ACEA AEM, SAE J2643 ACM-1, SAE J2643 ACM-2, SAE J2643 FKM-2, SAE J2643 HNBR-1, and SAE J2643 VMQ-1.***

Note that the elastomer test registration and upload requirements differ from other registered tests in two ways. First, ***only*** elastomer tests on ***final formulations*** in support of dexos licensing are to be registered. Second, test registration for elastomer tests will occur ***after*** the running of the tests. All other steps of the registration and upload process remain the same as for other tests.

GM is requesting that all elastomer test data used to support dexos 1 Gen 2 licensing requirements for approved and future formulations be uploaded to the dTRC. Already approved formulation test data should be uploaded by November 30, 2017. New formulation test data will be registered and uploaded as standard practice going forward.

In addition, GM is requesting that going forward all elastomer test data used to support dexos 2 formulations also be registered and uploaded to the dTRC.

If you have any questions, the dexos Test Registration Center contact information is:

Manager: Sean Moyer  
Phone Number: 412-365-1035
