General Motors LLC
30003 Fisher Brothers Rd
Warren, Michigan 48093

Dear Valued GM dexos Licensee,

This notification is to inform you that the dexos Committee will be adding 0W-40 and 5W-40 to our dexosD specification (GMW18006). The specification is in the process of being updated and will be republished to reflect this change by the end of September 2024. However, the dexos Committee can begin to review your proposals for these viscosity grades upon receipt of this letter.

These requests must be entered as dexosD submissions and meet the requirements as set forth within the specification.

All 0W-40 and 5W-40 dexosD formulations will be required to display both the dexosD and the dexos2 logos on the labels. Please utilize the “dual logo” selection for these viscosity grades.

If you have any questions, please feel free to contact us. We appreciate your continued support of the GM dexos programs.

Sincerely,

Aleise Jimenez
