

May 14, 2024

General Motors LLC  
31057 Louis Chevrolet Road  
Warren, Michigan 48093

Dear Valued GM dexos Licensee,

This notification is to inform you that GM will implement a royalty waiver on the sale of dexosD-licensed engine oil products, as described below. In addition, upfront one-time testing fees, and annual license release fees will be waived by GM.

The royalty waiver will last for four calendar quarters from the start of sale of your dexosD-licensed product, or until the end of 2025, whichever comes first. Submissions must be made for your dexosD product into our e-Submission portal prior to 1 July 2024. Also, for the first year of sale, license release fees will not be invoiced by GM. Sales volume reporting must continue for all products including this dexosD product.

Please note that if you are not already reporting by fluid type, as required by your License Agreement, you will need to begin to report by fluid type beginning with your next quarterly sales volume report.

Please advise us of your intent to take advantage of this opportunity at your earliest convenience.

If you have any questions, please contact us. We appreciate your continued support of the GM dexos programs.

Sincerely,

*Alaise Jimenez*
